Credcli - command line tool

Prerequisite

1. NodeJs 10.* must be installed

Install credcli tool

1. Fire the below command to install `credcli` command line tool,

```
npm i -g credcli
```

Steps to Add Macro - Video

1. Fire `credcli macro:add` command

```
credcli macro:add
--name bankcif
--label "Fetch CIF"
--app rmoneview
--route /customer-relationship/client
--folder /Users/prabhuvikas/repos/iwf-dev/macros/
```

2. Make changes in app function

3. Check the action on the screen.
   In this case rmoneview's customer-relationship route.

Steps to Remove Macro - Video

1. Fire `credcli macro:remove` command

```
credcli macro:remove
--name bankcif
--folder /Users/prabhuvikas/repos/iwf-dev/macros/
```

2. Removes the macro files and configuration
